

Georgiana Caprariu

ILLUSTRATOR, ANIMATOR & GRAPHIC DESIGNER

Hello, I'm Georgiana Caprariu. I studied the historical panorama of cinema and animation cinema for the purpose of a critical acquisition of the various artistic styles. I can be organized and precise, but I find it essential to know how to improvise. Having started using Photoshop when I was about 14, this program has accompanied me throughout my path in illustration and photomontage on the PC. Right now I use it in conjunction with my graphics tablet (Wacom One) for all things illustration related. Adobe Premiere Pro is instead the program I use to make video montages for animated shorts. When it comes to animations and motion graphics I use Adobe After Effects. Also when I work on personal works I like to curate every aspect including pagination. In this case it is best tool is Adobe Indesign.
